

Explanation to access the Progressfit app on Expo

- Download Expo Go from the App/Playstore
- Sign up with a new account
- Send a mail to merlin.minder@outlook.de with the e-mail you used to create the expo account
- I will add you to the project account
- You will see the app under projects once you are added
- Click the app and press default to launch the app

If any questions arise send a mail to the aforementioned address and I'll guide you through the process.

Or you can copy the GitHub files, Install the npm dependencies and run it yourself. 😊
